Aman Saiyed

AI & Cybersecurity Builder | Full-Stack Developer | Blockchain Engineer

Artificial Intelligence & Machine Learning Cybersecurity & Threat Detection Full-Stack Web Development

Ahmedabad, Gujarat, India

ABOUT

I'm a builder focused on creating real-world products at the intersection of AI, cybersecurity, and blockchain. I enjoy turning ideas into working systems from machine learning pipelines and security platforms to full-stack web applications and decentralized solutions.

I've built projects including an AI-powered RASP platform, phishing email detection system, blockchain identity verification platform, and DeFi security tools. My approach combines strong engineering fundamentals, security-first thinking, and continuous learning.

Currently pursuing a Diploma in Artificial Intelligence & Machine Learning while actively contributing to open-source projects and exploring emerging technologies.
