

ANIKET ROUNIYAR

Full Stack Developer

Scalable & Maintainable Backend, Distributed Systems & Developer Infrastructure · Available

Biratnagar-09, Nepal · afnoui.com · www.linkedin.com/in/aniketrouniyar

SKILLS

Typescript, Next Js, PostgreSQL, MongoDB, Docker, Nest Js, Redis, WebSocket, WebRTC, gRPC, GraphQL, Prisma, Drizzle

ABOUT

I build software systems that are designed to get faster, more scalable, and easier to maintain as they grow. While I work across the stack, my strongest focus is backend engineering, distributed and real-time systems, and the infrastructure that powers them. I enjoy turning complex problems into reliable, reusable systems through thoughtful architecture, testing, automation, and engineering practices that make future development simpler not harder.

EXPERIENCE

Associate JS/Cloud Developer · EKbana Solutions

Jul 2025 – Jun 2026

Kathmandu · full time

Full Stack Next Js Developer · Cbam-estimator

Jun 2026 – Present

Remote · full time

PROJECTS

AfnoUI

afnoui.com

Typescript · Next Js

A developer toolkit that turns complex React UI development into a faster, reusable workflow combining visual form, tables, kanban boards and tree structure design building, reusable components, code generation, and a powerful CLI that handles setup, dependencies, and configuration automatically.

Service-Based Marketplace Platform

services.aniketrouniyar.com.np

Typescript · Next Js · Redis · PostgreSQL · MongoDB · Prisma · Drizzle · Nest Js · gRPC · GraphQL

A scalable distributed marketplace for rooms, hostels, properties, vehicles, and local services. Built with GraphQL, gRPC, Redis, PostgreSQL, MongoDB, Docker, and high-concurrency Node.js, with secure RBAC/PBAC and server-side TDD. Designed around scalability, maintainability, and extensibility rather than simply shipping features.
