SKILLS

Next.js, React, Node.js, Python, TypeScript, JavaScript, Tailwind CSS, Flutter, Figma, UI/UX Design, PostgreSQL, MongoDB, Firebase, REST APIs, API Integration, Voice AI Agents, AI Chatbots, Git, Vercel

ABOUT

I am a Full-Stack AI Engineer and UI/UX Designer with a diverse technical background spanning web, mobile, and AI automation. I specialize in building complete digital systems from high-fidelity Figma wireframes to production-grade Next.js/React frontends and robust Python/Node.js backends.

My deployed portfolio features scalable cross-platform applications, including a global eSIM mobile data marketplace, a secure responsive Healthcare Appointment Booking portal with custom multi-role user/admin dashboards, and intelligent Voice AI/Chatbot agent orchestrations. I excel at database architecture (PostgreSQL/MongoDB), smooth API integrations, and writing clean, maintainable code optimized for scalability.
