PROJECTS

Multi Agent Financial Intelligence System

multi-agent-financial-intelligence.vercel.app

Python · Next js · Langgraph · SQL

Multi-Agent Financial Intelligence System is a production-ready AI application that enables users to analyze financial reports through natural language conversations.

Unlike traditional AI chatbots, the application coordinates multiple specialized AI agents responsible for planning, execution, and response evaluation. The system combines Retrieval-Augmented Generation (RAG) with semantic document retrieval to produce responses grounded in financial documents instead of relying solely on LLM knowledge.
