SKILLS

Typescript, Javascript, MongoDB, Express, Nest, Golang, React, Next, Postgres, Docker, AWS, GCP

ABOUT

I'm a software engineer focused on building scalable, reliable software products from the ground up. I'm particularly interested in system design, distributed systems, cloud infrastructure, APIs, and building products that solve real-world problems.

PROJECTS

Auction Ecommerce

bidnbuyglobal.com

Typescript · Next.js · Nest.js · Postgres · Docker · AWS

Bid&Buy is essentially an online auction marketplace where people can buy and sell products through live bidding or fixed-price "Buy Now" listings. It handles the transaction side too, including escrow protection, seller payouts, and bidding management.
