EXPERIENCE

Sr. Front-end developer · VoidPoint Consulting

Jan 2023 – Present

Remote · freelance

Technical Specialist · AT&T Global Services

Jun 2017 – Jan 2023

Hyderabad, India · full time

Front-end developer · Prerana Soft Solutions

Oct 2015 – Jun 2017

Hyderabad, India · full time

I have developed a front-end application in Angular that helps the Librarian across Public libraries, Universities and School. This application helps the users to search children's books by title, author, date of publication etc., This application has many features like creating/sharing Reading lists, creating/saving search criteria, Award search.

I created a Front-end application in Angular and also involved in the backend API development. using PHP Laravel.

• Created modular and scalable Angular components.

• Created custom components like Autocomplete, Pagination, Tabbed navigation etc.,

• Built the Login and Authentication system in the back-end

• Developed 'Discovery' feature on the Dashboard to display the Book titles

EDUCATION

BHPV High school · NA, NA
