ABOUT

Frontend Developer passionate about building functional, scalable, and user-friendly web applications with React, JavaScript, and TypeScript. I enjoy transforming ideas into intuitive digital experiences while focusing on clean code, performance, and great user interfaces. Experienced with modern web technologies and collaborative Agile/Scrum environments, I'm always eager to learn, solve problems, and create impactful solutions.

EXPERIENCE

Frontend developer · Austrobyte

Feb 2025 – Mar 2026

Remote · full time

- Architected and shipped a BOM Navigator feature that improved navigation efficiency by 35%, adopted by the full engineering team.
- Built a scheduling calendar (React Big Calendar) used by 50+ users across multiple roles and departments.
- Delivered HR management modules (leave requests, timesheets, assignments) from scratch within agile sprint cycles.
- Implemented role-based access control (RBAC) across CRM modules, reducing unauthorized access incidents to zero.
- Optimized GraphQL queries to eliminate over-fetching, improving Core Web Vitals and page load performance.
- Ensured cross-browser compatibility and responsive design across all delivered features; maintained WCAG accessibility standards.
- Wrote unit and integration tests using Jest and React Testing Library, improving release confidence across modules.
- Stabilized legacy modules by fixing critical production bugs, improving system reliability across releases.
- Collaborated daily with Laravel/PHP backend developers in a fully remote, distributed agile environment.
