

evm dev

Smart Contract Developer | Solidity | EVM | Foundry | OpenZeppelin

\$90/hr · Available

Bali, Indonesia

SKILLS

Solidity, Foundry, EVM, OpenZeppelin, ERC-20, Smart Contracts, DeFi, Blockchain, Smart Contract Testing

ABOUT

Smart contract developer focused on Solidity and EVM-compatible blockchains. Experienced with ERC-20 contracts, OpenZeppelin, Foundry, contract testing, debugging, deployment, and DeFi-related functionality. Looking for opportunities to contribute to secure, well-tested smart contract systems and blockchain applications.

EXPERIENCE

Smart Contract Developer · Independent / Freelance

Jul 2026 – Present

Bali, Indonesia · freelance

Developed and maintained Solidity smart contracts for an EVM/BNB Chain project, including ERC-20 token functionality, contract testing, debugging, deployment, and DeFi-related on-chain integrations. Worked with Foundry, OpenZeppelin, and command-line EVM tooling.

PROJECTS

Orvix Aggregator

orvix-frontend.vercel.app

Solidity · Foundry · EVM · OpenZeppelin · BNB Chain · Smart Contracts

Smart contract infrastructure for the Orvix ecosystem on BNB Chain. Built and worked on Solidity-based smart contracts for token and DeFi-related functionality, including development, testing, debugging, and on-chain integration.
