

Duke Mabiria

Senior Full-Stack Developer

Full-Stack Developer · \$18/hr · Available

Nairobi-Kenya · www.linkedin.com/in/duke-mabiria-a6436364

SKILLS

Django, Python, React, HTML, CSS, Javascript

ABOUT

I'm a full-stack developer specializing in React, Tailwind CSS, Python, Django, Django REST Framework, and PostgreSQL. I build responsive, user-focused web applications with clean component architecture, REST APIs, authentication, database systems, and practical product workflows. My recent work includes an e-commerce platform and a social media application, and I'm looking for remote opportunities where I can contribute to building polished, reliable digital products while continuing to grow as a developer.

EXPERIENCE

Full-Stack Developer · Anova Technologies

Jan 2026 – Present

Nairobi, Kenya · freelance

Developing a full-stack e-commerce platform focused on computers, laptops, smartphones, printers, and technology accessories. Built the Django and PostgreSQL backend, REST APIs, product catalog, categories, brands, product specifications, inventory management, and administration system. Currently developing the React and Tailwind CSS storefront with product discovery, search, shopping cart, checkout, and responsive user experiences.

EDUCATION

Dedan Kimathi University of Technology · B.Sc Computer Science, Computer Science

May 2011 – Feb 2015

Kenya

Studied software development and developed practical skills in programming, web development, databases, software engineering, and application development. Built projects using Python, Django, React, JavaScript, PostgreSQL, and related technologies.

PROJECTS

Anova Technologies — E-commerce Platform

github.com/dkdukes/Anova-Technologies

React · JavaScript · Tailwind CSS · Python · Django · Django REST Framework · PostgreSQL · REST API · Cloudinary

A full-stack e-commerce platform for the Kenyan technology market, focused on laptops, desktop computers, smartphones, printers, and computer and phone accessories. I am building the platform with a React and Tailwind CSS storefront and a Django REST Framework and PostgreSQL backend. The system includes product catalogs, categories, brands, detailed technical specifications, product images, inventory management, authentication, shopping cart, checkout, and order management.
