full stack developer

Backend & Full-Stack Development · Available

New Delhi, India · [www.linkedin.com/in/jai-verma-1b0640312](https://www.linkedin.com/in/jai-verma-1b0640312)

## SKILLS

---

html, css, js, tailwind, react, next.js, express, mongoose

## ABOUT

---

I'm a 4th-year B.Tech student at NSUT who enjoys building backend-heavy products and figuring out how things work under the hood. I've built projects like TradeX, a real-time stock trading simulator, and I'm currently exploring scalable backend systems, APIs, databases, and real-time applications. I'm looking for opportunities where I can work on real products, learn from strong engineers, and ship things that people actually use.

## EDUCATION

---

**netaji subhash university of technology · B.tech, ece(iot)**  
delhi

Aug 2023 – Present

## PROJECTS

---

### TradeX

[tradex-26.vercel.app](https://tradex-26.vercel.app)

Next.js · TypeScript · MongoDB · Auth.js · Socket.IO · Tailwind CSS

A full-stack stock trading simulator that lets users buy and sell virtual stocks without risking real money. I built the authentication, portfolio tracking, watchlists, trade history, and real-time price updates, with a backend designed to handle live market data and user trading activity.
