React, TypeScript, Next.js, JavaScript, Node.js, PostgreSQL, Tailwind CSS, TanStack Query, TanStack Table, Vitest, Playwright

ABOUT

Software engineer with 4+ years of experience building production web products with React, TypeScript, Next.js, and Node.js. I've worked on data-heavy interfaces, frontend performance, real-time AI features, APIs, and PostgreSQL-based systems. I'm looking for a remote frontend or full-stack product role where I can own features end to end and work closely with a strong engineering team.
