

Levan Tsibirashvili

Solidity Engineer | Smart Contract Developer

\$3500/mo · Available

Tbilisi, Georgia · www.linkedin.com/in/levan-tsibirashvili-97848bb1

SKILLS

Solidity, Foundry, Hardhat, Git, Cursor

LANGUAGES

English (professional), Russian (professional)

EXPERIENCE

Senior · Solidity University

part time

Jan 2026 – Present

EDUCATION

Solidity University

Apr 2025 – Dec 2025

PROJECTS

smart-deployer

github.com/levan-tsibirashvili/smart-deployer/tree/main/contracts

Minimal Proxy Pattern (EIP-1167): Utilizes the OpenZeppelin Clones library to avoid redundant contract deployment costs, significantly reducing gas fees for end-users by cloning minimal proxies pointing to a master implementation.

ERC1155 token

github.com/levan-tsibirashvili/ERC1155

Smart contract for ERC1155 using OpenZeppelin's AccessControl and ERC1155 standards.

Included deployment and interaction scripts.
