

Prince Esien

AI Product Engineer | Full-Stack Engineer | Next.js • TypeScript • React • AI Systems

AI Product Engineering & Full-Stack Development · \$60/hr · Available

London, United Kingdom (Remote) · www.veritrade.site/founder

SKILLS

TypeScript, JavaScript, React, Next.js, Node.js, Express.js, Tailwind CSS, PostgreSQL, Firebase, Docker, Git, GitHub, REST APIs, AI, OpenAI API, Google Gemini API, Prompt Engineering

ABOUT

Full-stack AI engineer and founder focused on building production-ready AI products from idea to deployment. I've built multiple real-world platforms across AI, healthcare, legal tech, fintech and career technology using Next.js, React, TypeScript, Node.js and modern AI APIs. I enjoy solving complex engineering problems, shipping quickly, and turning ambiguous ideas into polished products.

EXPERIENCE

Founder & AI Product Engineer · Self-employed

Jul 2022 – Present

full time

Designed, built and deployed multiple AI-powered web applications using Next.js, React, TypeScript and Node.js. Led product architecture, frontend development, backend APIs, AI integrations, deployment and ongoing iteration across fintech, healthcare, legal technology and recruitment platforms.
