

Raj Lathigra

Blockchain Developer

Smart contract Developer · 40 USD/hr · Available · remote, full time · available immediately

Vadodara, India · [linkedin.com/in/raj-lathigra](https://www.linkedin.com/in/raj-lathigra) · x.com/LathigraRaj

SKILLS

Solidity, Hardhat, Foundry, EVM, React, NodeJs, CSS, Rust, anchor, SVM, Python, C, C++

LANGUAGES

English (professional), Hindi (professional)

EXPERIENCE

Blockchain developer · Jadequest

Apr 2026 – Present

Ahmedabad · full time

EDUCATION

Parul institute of engineering and technology · B.Tech, Information & Technology

Sep 2021 – Jun 2024

Vadodara

PROJECTS

ERC 4626 Inflation attack

github.com/your-username/erc-4626-inflation-attack

Solidity · Foundry

ERC-4626 vaults price shares against assets using a simple ratio: `totalAssets() / totalSupply()`. That ratio is meaningless the moment a vault is empty, because whoever deposits first gets to set it. This project is a self-contained Foundry demonstration of the resulting "inflation attack," a working exploit against a deliberately naive vault, two production-grade fixes, and a fuzz suite that stress-tests both across a wide input range.
