

Sanket Pawar

Software Engineer

Backend · \$70/hr · Available

Pune, India · sanketttt.vercel.dev · x.com/gxjo_dev

SKILLS

React, NodeJs, Express, Postgre, DevOps

EXPERIENCE

Software Engineer · Siemens

Aug 2026 – Present

Pune · full time

Frontend development using Angular

Delivering and owning end to end features

Backend development for java based project

EDUCATION

Savitribai Phule Pune University · B.E, Computer Engineering

Nov 2021 – Jun 2025

Pune

PROJECTS

framethetic

framethetic.xyz

Typescript

My screenshots always looked flat. Just a raw PNG with a white edge, while everyone else's launch posts had nice backgrounds and shadows. Had no clue how people were making those.

So I built framethetic. Paste a screenshot, it drops it on a background with padding, rounded corners and a shadow. Browser or macOS window frames, iPhone and MacBook mockups, arrows and blur for hiding stuff, and export sizes like 16:9 and OG so it's ready for wherever you're posting.

Everything runs in your browser. Your screenshot never gets uploaded anywhere. No signup, no watermark, free.
