

Shiva Kumar Gurung

Software Engineer focused on MERN stack

Specialized in frontend web development with solid hands on backend experience · \$0/hr · Available

Kathmandu, Nepal · shivakumargurung.com.np · linkedin.com/in/shivakgrg

SKILLS

Typescript, React, Next.js, Node.js, Express, MySQL, TypeORM

ABOUT

Specialized in frontend web development with solid hands on backend experience

EXPERIENCE

Software Developer · Saransa Media Labs

Jun 2025 – Present

Remote · full time

Developed and maintained production-ready applications using Next.js, React, and TypeScript within large scale codebases, including the Medusa/MerkurJS commerce framework.

Built and enhanced marketplace features, vendor dashboards, and admin panels with a focus on usability and performance.

Implemented REST API integrations, Khalti payment gateway integration, and Algolia-powered search functionality.

Worked with SSR, SSG, ISR, and CSR rendering strategies to improve performance and SEO.

Developed administrative features including RBAC, hex-based permissions, TanStack Router, and TanStack Table for managing users, games, rewards, and system configurations.

Collaborated closely with backend engineers, utilized technical and API documentation, and contributed to delivering scalable, maintainable, and optimized frontend solutions.

Software Developer · RKD Limited

Nov 2022 – Nov 2024

Pokhara · full time

EDUCATION

Pokhara University · Bachelors of Computer Application, Computer Science

Sep 2018 – Jan 2023

Pokhara

PROJECTS

Marketplace Web App

Next.js · React · Tanstack · Axios · React Router · Node.js · Merkur.js · Redux

Developed and maintained production-ready applications using Next.js, React, and TypeScript within large scale codebases, including the Medusa/MerkurJS commerce framework.

Built and enhanced marketplace features, vendor dashboards, and admin panels with a focus on usability and performance.

Gaming Admin Dashboard

React · Tanstack Router · Radix UI · Tailwind · Tanstack Query · Redux

Developed administrative features including RBAC, hex-based permissions, TanStack Router, and TanStack Table for managing users, games, rewards, and system configurations.

Collaborated closely with backend engineers, utilized technical and API documentation, and contributed to delivering scalable, maintainable, and optimized frontend solutions.

Social Media App

React · Express · WebSockets · Axios

- Primarily Focused on performance optimization, UI and UX refinement and maintenance.
