Full-Stack & AI Systems Engineer | React, Node.js, Python, PostgreSQL

Full-Stack Web Applications, Backend APIs & AI Tooling · \$40/hr · Available

Lucknow, India (Remote Worldwide) · www.utsavmishra.me · linkedin.com/in/utsav-mishra1 · x.com/Utsav_mishraa

SKILLS

React.js, TypeScript, JavaScript, Node.js, Python, PostgreSQL, Next.js, Express.js, FastAPI, Redis, Docker, REST APIs, Git, Tailwind CSS

ABOUT

Full-stack engineer with 2+ years of experience building production web applications, data pipelines, and developer tooling.

Specialized in building end-to-end systems from scratch using React, TypeScript, Node.js, and PostgreSQL. I have built business ERP platforms with database-enforced business logic, real-time WebSocket messaging architectures, and automated ETL pipelines processing thousands of records.

Active open-source contributor with merged pull requests in major repositories like Remotion, and author of public developer tools and MCP servers. Focused on writing clean, well-tested code, meeting strict deadlines, and communicating clearly across remote teams.

EXPERIENCE

Full Stack Developer · SM Infotech Solutions

Feb 2024 – Jun 2025

Remote · full time

Contributed to 8+ full-stack web applications spanning e-commerce, internal tooling, and real-time systems using React, Node.js, PostgreSQL, and Redis. Built WebSocket messaging architectures with Redis Pub/Sub, optimized database queries, and owned feature delivery from requirements through deployment.

EDUCATION

Dr. Ram Manohar Lohia Avadh University · Bachelor of Computer Applications (BCA), Computer Applications

Feb 2022 – Sep 2026

PROJECTS

DevDocsAI

devdocs.utsavmishra.me

DevDocsAI is an AI-powered developer documentation assistant. Ask questions about any library or framework and get accurate, live answers enriched with real documentation. Access via web, CLI, API, or MCP server.
