Solidity, typescript, nest.js, express, next.js, rust, smart contract auditing

ABOUT

I'm a full-stack blockchain software with a strong focus on smart development/auditing and payment infrastructure (stablecoin and fiat). Looking for opportunities to contribute my wealth of knowledge to meaningful projects

PROJECTS

Planbok

planbok.io

Next.js · node.js · cryptography · Postgres · Redis · Express · MPC

Planbok is a programmable wallet infrastructure with built-in payment rails for stablecoin and fiat currencies designed to help businesses easily integrate blockchain and traditional finance based features in treasury management, payment & payroll.
